DETAILED ACTION

1. In further review of the application/claims the examiner is now providing a restriction. Any inconvenience caused to the applicant is regretted.

Election/Restrictions

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-9 are drawn to a full color video projector including the subcombination of a reflective micro-mirror light valve which is claimed specifically (as done in claim 18). Claims 10-17 are drawn to a full color video projector system in the subcombination of a light valve means which is claimed broadly (with respect to claim 18).
- II. Claims 18-36 pertain to a reflective micro-mirror light valve, where the valve is claimed specifically.

Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because claim 10 broadly recites the light valve means, which indicates that the combination does not require the entire submcombination as claimed. The subcombination has separate utility such as a system which is not a full color video projector system (i.e. printer, scanner etc..).
